CapStorm	CapStorm	SaaS	CapStorm: BackUp And Recovery gives security, platform, and compliance teams the ability to restore Salesforce fast – with full schema fidelity, BYOK encryption, and infrastructure your own infrastructure. It offers a robust set of Salesforce data management solutions including: enterprise reporting, integrations, ETL/Reverse ETL, sandbox seeding, and backup & recovery.	CSBACKUPRECOVRY	\$81000.00	4.00%	\$78343.20	p/org
CapStorm	CapStorm	SaaS	CS:Govern®, and includes all of the functionality of CS:Enable®. CS:Govern® provides additional value in its ability to granularly segment regulated data into compliance categories and control “who sees what” for Salesforce data at-rest. This ensures compliance controls within Salesforce are replicated to the off-platform repository, enabling enterprises to leverage this data without creating additional risk	CSGOVERN	\$120000.00	4.00%	\$116064.00	p/org
CapStorm	Snowflake Connector	SaaS	CapStorm:Sync mirrors Salesforce data, metadata, and schema to your data warehouse – in near real time, with full structure, no staging layers, and complete control over infrastructure and keys.	SNOWFLAKE	\$45000.00	5.00%	\$43070.63	p/org
CapStorm	Archive Add On	SaaS	CapStorm Archive provides archived storage for Salesforce data using the Delete Salesforce Records tool. It enables organizations to store legacy Salesforce records externally, programmatically purge records, and view historical data outside the Salesforce platform, helping maintain org performance and compliance.	ARCHIVE	\$20000.00	5.00%	\$19142.50	p/org
